Delhi, Uttar Pradesh | +91 9560508400 | [harshhk512@gmail.com](mailto:harshhk512@gmail.com) | [in harsh-kumar-hk09/](https://www.linkedin.com/in/harsh-kumar-hk09/) | [gh harshhk](https://github.com/harshhk)

## EDUCATION

**Vellore Institute of Technology | CGPA: 7.47**

September 2022 – July 2026

– B.Tech in Computer Science & Engineering (Data Science)

Focus: Business Analytics, Data-driven Decision Making

## TECHNICAL & ANALYTICS SKILLS

**Languages:** Python, Java, C, JavaScript, SQL

**Analytics:** EDA, Predictive Analysis, PowerBI, Decision Support

**DevOps and Toolkits:** AWS (Basic)

**ML & Data Science:** NumPy, TensorFlow, Keras, R, MATLAB

## EXPERIENCE

Software Engineering Intern | LG Electronics

June 2025 – July 2025

- Developed an Excel-based project management dashboard with Gantt charts, task tracking, and budget analysis to improve monitoring and reporting efficiency.
- Performed unit testing of system modules (CPU usage, memory threshold checks, and application status validation), ensuring reliable performance of core processes.
- Automated reporting workflows and collaborated with engineers to enhance accuracy in project tracking and resource management.

## AWARDS AND CERTIFICATIONS

- Internship Certificate | LG Electronics June - July 2025
- Team Coordinator | Aikya Cultural Fest (VIT) - Successfully led and coordinated a cultural event, managing team collaboration and event execution Feb 2024 & Feb 2025
- Google Analytics Certificate August 2025
- Microsoft Excel Advanced August 2025

## PROJECTS

**PC Health Dashboard** | Python, TensorFlow, RESTful API, excel, HTML, CSS, Fast API | GitHub, [PC-Health-Dashboard](#) - July 2025

- Built a system health analytics dashboard to track CPU, memory, and application metrics for early failure detection.
- Implemented predictive analysis for system health and potential failures using TensorFlow.
- Developed RESTful APIs with FastAPI to fetch and display real-time system data on a web interface.
- Designed a user-friendly interface using HTML/CSS for visualization and quick performance insights.

**WAFinity** | Python, Matplotlib, TensorFlow, Keras, ReactJS, FastAPI | [WAFinity---Infinite-Protection-Intelligent-Detection](#)

September 2025- present

- **WAFinity** is an Advanced Web Application Firewall (WAF) that protects web applications from known threats such as SQL injection, Cross-Site Scripting (XSS), and other similar attacks by filtering and monitoring HTTP traffic between the application and the Internet.
- In addition to signature-based detection, it uses machine learning-based anomaly detection to identify obfuscated, zero-day, and previously unknown attacks by analyzing patterns and behaviors in incoming requests.

**COVID-19 Impact Analytics** | Research project, analytic project | GitHub [COVID-19-ANALYSIS-DATA-SCIENCE-PROJECT](#) August 2025

- Perform Exploratory Data Analysis (EDA) to identify trends in cases, deaths, and hospitalizations.
- Build classification models to predict mortality severity.
- Built classification models to assess severity risk, supporting insights relevant for policy and resource planning.
- Presented findings through visual dashboards and structured summaries for clear stakeholder communication.

**Fake News Detection using BERT** | Research project, NLP project | August 2025

- Performed extensive text preprocessing and Exploratory Data Analysis (EDA) to identify patterns in fake and real news articles.

- Fine-tuned a BERT-based transformer model for binary text classification to detect fake news with high accuracy.
- Evaluated model performance using precision, recall, F1-score, and confusion matrix to assess classification reliability.
- Built interactive visualizations and summarized insights through dashboards and reports for effective stakeholder communication.

## EXTRACURRICULAR

---

### **Coordinator | Aikya Management Team- VIT Student Chapter**

*February 2024 - 2025*

- Spearheaded and managed many of VIT Vellore's premium, large-scale events with footfall of more than 1000 students.
- Led coordination of large-scale university events (1000+ participants), handling operations, marketing coordination, and execution planning.

### **Member | ic-ETITE '24 BOLT 2.0 Hackathon**

*February 2024*

- Was an integral part for the BOLT 2.0 Hackathon conducted as a part of the Second International Conference on Emerging Trends in Information Technology and Engineering, by IEEE Madras.

### **Dance Club | Core Member – VIT Student Club**

*June 2024- September 2025*

- Performed in choreographed flash mobs and campus events, showcasing teamwork and creativity.
- Assisted in coordinating rehearsals and event logistics to ensure smooth execution.
- Promoted cultural engagement and community spirit through performing arts activities
